From: Director General of Mines Safety  
Directorate General of Mines Safety  
P.O & Distt: Dhanbad - 826 005

To: Nominated Owner and  
Director (Tech) P & P  
M/s Bharat Coking Coal Limited,  
Koyla Biharan, Koyla Nagar,  
Dhanbad-826 005

Sub:- EAMS Approval under Regulation 238(3) of the Coal Mines Regulations, 2017, for Flameproof and Intrinsically safe electrical equipment (as mentioned in Annexure-B) associated with Longwall Package manufactured by M/s. Zhongzhou Coal Mining Machinery (Group) Co., Ltd., China for use in underground Coal Mines in the name of M/s. Bharat Coking Coal Ltd., as site, equipment and user specific at Moonabit Project.

2. BCLL/IT(D)W/1/3/P-12(D)/121 dated 08.11.2017.

Manufacturer’s declaration as to standard with which the machine comply in respect of:
(a) General design, rating & performance : as per drawing submitted
(b) General Requirements : IS/IEC 60079-0: 2000
(c) Intrinsically safe electricals : IS/IEC 60079-11: 2006 &
(d) Flameproof construction : IS/IEC 60079-1: 2007

IDENTIFICATION MARK  
IXIMS APPROVAL No. Z3-LE OF 2017

Dear Sir,

In reference to the field trial permission issued vide letter No. 1809/EM dated 12.11.2013, subsequent field trial extensions & based on the performance report received from Moonabit Colliery of M/s. Bharat Coking Coal Ltd., Dhanbad and further to the letters referred above, subject to compliance of following conditions(Annexure-A) and test reports as referred in Annexure-B, approval is hereby accorded to the above equipment for use in underground coal mines for a period of five (05) years from the date of issue of this letter.

The application for renewal should be made at least three (03) months before the date of expiry of this approval.

Yours faithfully,

(Praveen Kumar Sarker)  
Director General of Mines Safety
Annexure A

Conditions for Approval under Regulation 298(3) of the Coal Mines Regulations, 2017, for Flameproof and Intrinsically Safe electrical equipment (as mentioned in Annexure-B) associated with Longwall Package manufactured by M/s. Zhengzhou Coal Mining Machinery (Group) Co. Ltd., China for use in underground Coal Mines in the name of M/s. Bhilai Coking Coal Ltd., as site, equipment and user specific at Moonidih Project.

1. A report from a certification body (as per Clause 13.1 of Approval Policy 2015, Second Revision 05.06.2015) indicating the status, health and integrity of protection, safety features etc., conforming to relevant standards shall be submitted at the time of renewal of approval.

2. The relevant provisions of the Central Electricity Authority (Measures relating to Safety and Electric Supply) Regulations, 2010 shall be complied with in all matters relating to the installation, operation and maintenance of the equipment.

3. The user shall maintain coordination with the supplier/manufacturer to get themselves fully appraised of any difficulty with regard to the use, maintenance and operation of the equipment.

4. The user, in consultation with the supplier/manufacturer, shall frame a code of practice to provide the guidance to persons employed for installation, operation and maintenance of Longwall and associated equipments, as well as to provide safety and health of persons so employed.

5. Any replacement of parts required for maintenance of the equipment which are directly or indirectly related to the flameproof features thereof shall be supplied by the manufacturer as and when required.

6. The flameproof electrical equipment associated with the machine shall be checked by the Electrical Supervisor of the mine for their compliance as per standards. The condition of cables in the machine shall be checked at the beginning of each working shift and the findings thereof entered in a bound-paged book maintained for that purpose shall be duly signed by the Electrical Supervisor with the date.

7. All covers, doors/access covers of the electrical equipment mounted on the equipment, on opening/removal which may expose live internal conductors, shall have warning instructions either by raised lettering or by other suitable means against such opening/removal of covers, doors and access covers, without initiating supply of energy to the equipment from its source.

8. The electric supply to the machine shall be controlled from flameproof Gata-on/off box/load Center with intrinsically safe supply for control circuits, of suitable rating, along with sensitive earth leakage protection.

9. The plug and socket assembly utilized to the machine, if provided, will be so interlocked as to prevent removal of plug from the socket whilst alive.

10. The electrical and mechanical personnel who may be entrusted with the responsibility for the use, maintenance and operation of the machine shall be given adequate training.
11. (a) The user shall maintain the records of the test report from the testing laboratory with the factory certified drawing, a copy of the condition & special condition, maintenance schedule, if any, recommended by the testing laboratory in their test report(s) so as to maintain safety features of apparatus/equipment.

(b) The user shall also maintain the record of a copy of factory test report along with drawings, instruction manual on the installation, operation and maintenance of the equipment and spares parts catalogue, etc.

12. The user shall furnish the performance report of the equipment directly to this Directorate after one (01) year of initial use.

13. (a) The design of the electrical circuit shall not be changed without obtaining prior approval from this Directorate.

(b) Concealed wiring insulations against opening the cover of the main enclosure or of any apparatus which gives access to the flameproof enclosures on live parts or which is designed to receive cable attachment unless the supply to the unit is isolated at source, shall be removed permanently on the respective part to ensure that all live parts within the unit are made dead and safe.

14. Spare parts shall be made readily available as and when required for proper maintenance of the equipment.

15. Any failure in the equipment shall be intimated to this Directorate.

16. All sensing devices shall be regularly tested and, routinely calibrated or verified to ensure correct operation and a record of the same shall be maintained.

17. Automatic preset warning devices shall operate prior to the movement of the shearer, AFC, EBL, etc.

18. An automatic control system to prevent hitting the raised sections of the pan line at face ends or other obstructions by the lump breaker fitted with shearer shall be provided.

19. All the operating controls shall be clearly marked and ergonomically designed conforming to any International Standards.

20. Periodical testing of the brakes of shearer shall be conducted by a competent person as per the manufacturer's guidelines and the same shall be recorded in a separate bound with log book or soft copy. The shearer shall come to a controlled stop whilst travelling at maximum speed down the maximum allowed operating gradient.

21. A suitable fire fighting system shall be arranged near to the equipment.

22. The automatic shut down of the shearer drum rotation if the water pressure of flow rate drops below the minimum recommended value shall be maintained.

23. All electrical and mechanical safety critical components that are essential to the operation of the automatic shutdown system or emergency stop system shall be replaced or overhauled at intervals recommended by the manufacturer and a record of the same shall be maintained.

24. The temperature and humidity of surrounding air at the equipment installed location shall be maintained as per the recommendations of the manufacturer, by providing suitable ventilation.
25. The automatic erosion mixing system and its recording system shall be meticulously maintained at pumps station. The Safe Operating Procedures for working / interacting with high pressures shall be framed and followed.

26. The cables in machine shall conform to requirement of provisions of the DGMS Tech. Circular (Electrical) No. 17 dated 25.05.2015 and DGMS Tech. Circular (Electrical) Approval No. 01 dated 19.02.2015 in addition to the special requirement, if any, specific to the safe operation of the machine.

27. Any modification/alteration to the machine that might be considered necessary at a later date in the interest of safety or/and efficient handling, operation, maintenance and maintainability of the machine shall be carried out upon being so directed.

28. The fire resistant hydraulic fluid shall conform to the standards and parameters as prescribed in the DGMS/Mech/Tech.Cr (Approval) No. 02, Dhanbad, dated 13.07.2015.

29. The high pressure hydraulic hoses supplied with the machine shall conform to the standards and parameters as prescribed in the DGMS/Mech/Tech.Cr (Approval) No. 44, Dhanbad, dated 13.02.2015.

30. An officer of this Directorate may at any time draw a sample and get it tested at the cost of the user in whose favour approval is accorded. If the test reports are not satisfactory, this approval shall be deemed to be suspended.

31. The cable entry devices, threaded adaptors and stopping plugs shall be suitable for the equipment and be considered as a part of equipment (not a component). The cable entry device and cabling methods used shall be suitable for their intended duty and for the special type of cable used in mining. Such cable entry devices shall be duly certified as per relevant IS/IEC standards.

32. The approval of the subject equipment is with regard to IS standards mentioned herein. Other relevant standards applicable for assessment of its electrical parameters required under type test have not been taken into consideration.

33. All circulars/general approvals issued by DGMS from time to time, relevant to the equipment shall also be complied with.

34. The approval is accorded for a period of five (05) years from the date of issue of this letter.

35. At the time of applying for renewal, details of supply with name of mines, purchase order and date shall be furnished with the application.

36. If at any time any of the conditions subject to which this approval has been granted, is violated or not complied with, this approval shall be deemed to have been revoked with immediate effect.

37. The above approval may be amended or withdrawn at any time, if considered so necessary in the interest of safety and is being issued without prejudice to any other provisions of law which may be or may become applicable at any time.
