DIRECTOR GENERAL'S MESSAGE

Dear Colleagues and Stakeholders,

I am pleased to present the DGMS Quarterly Bulletin for the period October to December, 2025.

During this quarter, the Directorate General of Mines Safety (DGMS) continued to intensify its efforts towards strengthening occupational safety, health, and welfare in the mining sector. A significant focus of this period has been the progressive implementation of the **Occupational Safety, Health and Working Conditions (OSH&WC) Code, 2020**, which marks a transformative step in consolidating and modernizing the regulatory framework governing mine safety and workers' welfare. DGMS has undertaken awareness programmes, consultations, and preparatory initiatives to facilitate effective implementation of the Code and to ensure alignment with its objectives across the mining industry.

In addition, DGMS organized and participated in a wide range of initiatives, including Safety Awareness Programmes, Tripartite Safety Review Committee Meetings, Silicosis Awareness Campaigns, First-Aid Competitions, capacity-building workshops, and national-level seminars. These initiatives are aimed at fostering a proactive safety culture, enhancing compliance, and promoting preventive approaches to occupational hazards in mines.

I also take this opportunity to acknowledge the continued efforts of our officers and staff, who have actively participated in training and capacity-building programmes at reputed national institutes, thereby strengthening institutional competence and preparedness. Such initiatives are essential for effectively addressing emerging safety challenges and implementing new legislative frameworks.

DGMS remains committed to working collaboratively with all stakeholders to create safer, healthier, and more sustainable workplaces in the mining sector. I encourage readers to share their valuable feedback and suggestions, which will greatly assist us in improving the quality and relevance of future editions of this Bulletin.

Together, let us continue our collective efforts towards achieving excellence in mine safety and occupational health.

Ujjwal Tah
Chief-Inspector of Mines &
Director General of Mines Safety

CIRCULARS

The Directorate General of Mines Safety has issued guidelines on the Prevention of Accidents due to Fall of Persons from Height or into Depth in Mines vide DGMS (Tech) Circular No. 06 of 2025 dated 20.11.2025.

No. DGMS (Tech) Circular No. **6** of 2025

Dhanbad, dated **20/11/2025**

To
The Owner, Agent and Managers of all Mines

Subject: Prevention of accidents due to Fall of Person from Height/ into Depth in mines.

It has been found that fall of persons from height and fall of person on same level are significant causes of fatal accidents in mines.

From 2015 to 2024, there were a total of 113 fatal accidents (38 accidents in coal mines and 73 in metalliferous mines and 02 in Oil mines) attributed to this cause. Fall of Persons from Height/into Depth alone resulted in 96 fatal accidents, Fall of Persons on the Same Level resulted in 09 and 08 fatal accidents respectively.

Accidents due to fall of person from height and fall of person on the same level in the coal, metalliferous and oil mines from 2015 to 2024 is provided in Table 1 given below:

Table 1: Fatal accidents due to fall of person from height and fall of person on the same level in the coal, metalliferous and oil mines from 2015 to 2024

Year	Fall of Person from Height/into Depth			Fall of Persons on the Same Level			Total
	Coal	Metalliferous	Oil	Coal	Metalliferous	Oil	
2015	3	8	1	1	0	0	13
2016	4	8	1	0	0	0	13
2017	1	6	0	1	2	0	10
2018	3	6	0	0	0	0	9
2019	4	6	0	1	4	0	15
2020	5	9	0	0	0	0	14
2021	1	5	0	3	0	0	9
2022	3	9	0	0	1	0	13
2023	1	1	0	2	1	0	5
2024	4	7	0	1	0	0	12
Total	29	65	2	9	8	0	113

[Handwritten signature]

Inquiries into the accidents due to fall of person from height and fall of person on the same level revealed that the majority of accidents were due to human behaviour or unsafe acts, non-availability/usage of PPE (like Safety Belt), inadequate supervision, non-implementation of Safe Operating Procedures, non-conductance of risk assessment/job safety analysis and deployment of unskilled/untrained persons.

A Model check list to prevent accidents due to fall of person from height is provided herewith for guidance:

Table 2: Model check list to prevent accidents due to fall of person from height in mines

S.No.	Item	Yes/ No
1.	Is there an effective Safe Operating Procedure formulated for working at heights?	
2.	Are all workers aware of the Safe Operating Procedure for working at heights and its importance?	
3.	Is the task kept under the supervision of competent supervisor?	
4.	Is adequate lighting throughout to reduce the risk of falls in low visibility conditions?	
5.	Are fall protection devices provided to the concerned persons readily available for use?	
6.	Are reasons for failing to use fall protection devices and remedial measure taken?	
7.	Are there adequate training modules prepared on the correct usage of fall protection devices?	
8.	Is it verified by the senior mine officials that the training certification was made after effective training?	
9.	Is there a proper communication system between supervisors and workers regarding job duties?	
10.	Is there a clear accountability process for safety violations related to falls?	
11.	Are there regular safety meetings focused on fall protection practices?	
12.	Are workers encouraged to report safety concerns and are they taken seriously?	
13.	Are lessons learned from previous incidents documented and communicated to all relevant personnel?	
14.	Are guardrails, safety nets and platforms etc. are of proper design and construction and properly in place?	
15.	Is there an effective emergency response plan to respond quickly to fall-related incidents maintained?	
16.	Are persons working near edges or unstable areas prohibited unless secured by fall safe system/ safety belt or full-body harness provided?	
17.	Are properly designed roads or footpaths equipped with handrails and ladders?	
18.	Are mobile phone use is restricted in work areas to minimize distractions?	
19.	Any other measures required/ reported by officials or Supervisors have been taken into consideration before resumption of work?	

If any of above questioners having answer No, shall further be reviewed by Manager/ Safety Officer before resumption of work.

The analysis of historical data highlights the persistent risks associated with fall of person from height, emphasizing the urgent need for comprehensive safety measures. By implementing effective training programs, enhancing safe work practices, and installing robust engineering controls, mining organizations can significantly reduce incidence related with fall of persons.

The persons to be deployed to work at height shall be subjected to such test which enables his suitability for the same including Vertigo test. Unless the person is successfully undergone such test, he shall not be deployed to work at heights.

Therefore, I request you to adopt a proactive approach that emphasizes accountability, continuous education, and the review and updating of the Safety Management Plan/ System, thereby improving Safe Operating Procedures and implementation of simple checklists to eliminate the impact of falls and protect the workforce in the mining industry.

DGMS (Tech) Circular No. 7 of 2025

Dhanbad, Dated 20/11/2025.

To

All Owners, Agents and Managers of Opencast Mines Coal and Metalliferous Mines and OEMS.

Subject: Ensuring Safety Features in HEMM and Auxiliary equipment used in Open Cast Coal & Metal Mines for preventing fatal accidents, serious accidents, and dangerous occurrences.

I invite your attention to the alarming increase in accidents involving Wheeled Trackless Transportation Machinery, specifically dumpers, tippers trucks and similar vehicles etc. deployed by departmental and outsourced in open cast mines. The analysis of accident statistics in coal and metal for the year 2025 revealed that a total of 38 and 32 fatal accidents occurred involving 49 and 39 fatalities in coal and metalliferous mines respectively. Out of the total 12 fatal accidents involving an equal number of fatalities in coal and 4 fatal accidents involving an equal number of fatalities in metal were related to transport machinery such as dumpers, tippers, and similar vehicles. In the same year, a total of 31 and 05 serious accidents in coal and metalliferous mines respectively recorded related to transport machinery, resulting in serious injuries to 31 and 8 persons respectively.

In 2025 (till 30th September, 2025) a total of 10 and 04 fatal accidents reported causing fatalities 10 and 05 in Coal and Metalliferous mines respectively involving transportation machinery. Similarly 07 serious accidents causing 08 serious injuries in coal mines reported in 2025 (30th September, 2025) by transport machinery.

From the analysis of above accident revealed that, most of the fatal and serious accident occurred due to wheeled trackless equipment in coal and metal mines were caused by toppling of equipment (dumpers and tippers) and/or run over by equipment.

The analysis further revealed that all the above accidents could have been averted had the precautions & preventive measures are mentioned in the above guideline circular issued from the Directorate had been taken same may be follows.

Statutory Compliance and Documentation:

1. Gazette notification G.S.R. 987(E), Dhanbad, the 1st October, 2018, on 'Safety features and devices to be provided in Heavy Earth Moving Machinery (HEMM) including trucks and tippers" under Reg. 216(2) of the Coal Mines Regulations, 2017 including fail-safe brake before deploying tippers into operations shall be ensured. Implementation of safety systems as per Bureau of Indian Standard as amendment 1 of 2024 in IS-17055 (Part-6): 2021 Earth-Moving Machinery Safety Part 6 Requirements for dumpers & tippers and DGMS (Tech.) Circular no. 06 of 2020 listed provisions for implementation in all wheeled trackless transport machineries shall be ensured.
2. Wider adoption & usage of proximity warning device/system for adequate and timely alert generation to the Dumper, tipper operators as amendment 1 of 2024 in IS-17055 Part-6 technical standard in all operating wheeled trackless transportation machineries operating in opencast mines in conjunction with following the Safe Operating Procedures (SOP) framed for dumper operation as required under Regulations 63(g) of the Coal Mines Regulations, 2017.
3. Implementation and usage of appropriate mechanical anti-collision devices for all different capacities of wheeled trackless transportation machinery.
4. A warning system to detect operator fatigue, along with an ergonomically designed operator's cabin capable of accommodating varying weather conditions, shall be provided in Dumpers/Tippers.
5. A separate haul road shall be provided for Light Motor Vehicles plying in the mines premises as required under clause no.7 of the gazette notification no. G.S.R. 976(E), Dhanbad, the 1st October, 2018 on "Conditions for Haul Roads" under Regulation 101 of the Coal Mines Regulations, 2017.
6. All persons employed or to be employed to operate heavy earth moving machinery including tippers and dumpers shall be trained and their competency shall be evaluated by a Board constituted by the management, who shall be persons who are not connected with imparting training. Training modules for imparting special training to "operators" or "Drivers" of wheeled trackless equipment shall be prepared based on the size, capacity, type, manufacturer, use, etc., of the equipment and considering OEM modules/schedules on operation and maintenance.

It is my firm belief that taking appropriate above steps will go a long way in preventing accidents involving wheeled trackless transportation machinery in opencast coal and metal mines.

This Circular is issued in suppression of earlier Circular issued vide No. 253, dated 30.06.2025.

Il presidente della Camera, Franco Marini, ha annunciato che il governo ha deciso di non presentare una proposta di legge per la riforma del sistema elettorale. La decisione è stata presa dopo una lunga consultazione con i partiti e i parlamentari. Marini ha sottolineato che la riforma elettorale è un tema complesso e che il governo deve prima ascoltare le opinioni di tutti i soggetti coinvolti. Ha anche menzionato che il governo ha già avviato alcune iniziative per migliorare il sistema elettorale, come la creazione di nuovi collegi elettorali e la riforma del sistema di voto. Marini ha concluso che il governo continuerà a lavorare per migliorare il sistema elettorale e che si terrà conto delle opinioni dei cittadini e dei parlamentari.

Il primo è quello di avere più di un modo di dire la stessa cosa. In italiano, per esempio, si può dire "questo è un cane" o "questo cane è un cane". In inglese, invece, si può dire "this is a dog" o "this dog is a dog".
